## Summary

I am a passionate front end developer with over a year experience. I have self taught myself JavaScript and Front end development. I love to solve complex problems by researching multiple ways and solving it in the best way. I keep myself updated by following technology facebook groups, youtube videos and twitter. I focus on writing simple and maintainable code. I ask right questions to gain complete knowledge for the requirement and start developing . I work hard to complete the assignments within the timeline. I have focused on following technologies primarily JavaScript and React. I also tried Angular, Python , Django Framework and PostgreSQL database. I also did couple of freelance projects.
